VAJJALA UMA VENKATA ABHIRAM SHARMA

+917013825894 | vajjalaabhiram@gmail.com | India | LinkedIn | Portfolio | GitHub

SUMMARY

Entry-level software developer with strong foundations in Data Structures and Algorithms, Object-Oriented Programming, and problem-solving using C++, Java, and Python. Experienced in developing scalable full-stack applications and AI-powered solutions, with expertise in algorithm design, database management, and API integration. Passionate about solving complex computational problems, writing efficient code, and building robust software solutions.

SKILLS

Programming	: Java, C++, Python, JavaScript
Frameworks & Libraries	: React, React Native, Node.js, Express.js
Databases	: MongoDB, SQL
Cloud & DevOps	: Azure AI, GitHub
Core CS & Networking	: Data Structures & Algorithms,Computer Networks, OS, DBMS
Other Tools & Skills	: REST API Development, Authentication Systems, Responsive UI/UX Design, Agile Methodologies

EDUCATION

Aditya College Of Engineering & Technology - *BTECH, Computer Science Engineering (Artificial Intelligence And Machine Learning) - (GPA: 8.43)* **Oct 2022 — Present**

PROFESSIONAL EXPERIENCE

Full Stack Development with React native Intern - Technical Hub pvt.Ltd **Jun 2024 — Jun 2025**

- Developed and deployed **React+Node applications for 200+ users**, cutting API response times **300ms → 120ms**.
- Built **cross-platform mobile apps** with React Native, improving accessibility and performance.
- Designed **scalable REST APIs** and optimized data workflows for reliability.
- Contributed to **Agile sprints, Git workflows, and code reviews**, boosting team delivery by **15%**. **PROJECTS**

Go-Karting Web Application, Link **Mar 2025 — Apr 2025**

- Engineered a **React + Node.js** event platform serving **200+ participants**, enabling team registrations, live scoring, and secure **₹5L+ payment processing** via Razorpay.
- Built an **admin dashboard** for role-based access, payment tracking, and team management, **reducing manual operations by 70%**.
- Integrated **WebSockets** for real-time score updates and live event engagement, improving user retention and transparency.

LateComers Notification System, Link **Oct 2024 — Dec 2024**

- Developed a **full-stack web app (React, Express, MongoDB)** to automate visitor passes and send **real-time SMS alerts** to parents and HODs for 1,000+ students.
- Designed **JWT-authenticated role-based access control**, improving campus security and accountability.
- Optimized UI and backend workflows, **cutting manual entry time by 60%** and enhancing overall campus safety measures.

SocialSafe-AI, Link **Present**

- Developed a platform with features to detect online harassment and inappropriate contents based on artificial intelligence. The detection can be done based on texts, audio, video and images. The platform has been developed by implementing React Native for application, Python for backend and artificial intelligence models, and MongoDB for database.
- Implemented DistilBERT to detect texts and languages. For content, used OpenAI Whisper to first convert the speech to texts and then check the risks associated with the content. For Images and videos, implemented NudeNet to detect the visual content. Fused the outputs from these three models using fusion engine to get proper risks analysis.
- Implemented a secure login with JWT token to handle user sessions. Also implemented mobile OTP verification to verify the users. Developed REST APIs for real-time monitoring and response to safety issues.

CERTIFICATIONS

IT specialist Java, Pearson

Microsoft Azure AI Fundamentals, Pearson

IT specialist JavaScript, Pearson

Cisco CCNAv7: Introduction to Networks, cisco

ACHIEVEMENTS

- **Team Lead**, Mobile Application Project (J-Path Mobile app)
- Solved **900+ LeetCode problems**
